Summary

Full-Stack Software Engineer with 4+ years of experience specializing in frontend development using React.js, Next.js, TypeScript, and modern web technologies. Experienced in building high-performance scalable web applications while contributing across the full stack with Node.js, NestJS, and cloud-based development workflows. Passionate about creating responsive, accessible, and maintainable user experiences.

Experience

Platter Management **Software Engineer** Apr 2026 – Present

- Developed and maintained the marketing website using Next.js and Server Actions, improving performance and delivering a seamless user experience.
- Owned the POS Back Office Admin Panel, implementing GraphQL-based features such as Customer Facing Display (CFD) and role-based access control, while resolving production issues and delivering enhancements through Jira.

Communication Crafts **Software Engineer** Mar 2024 – Mar 2026

- Developed and maintained key modules for the Notch Carbon Accounting Software, including site management, reporting, user profiles, and membership features, while implementing role-based authentication to strengthen security and access control.
- Developed customer-facing and administrator applications for Alpha Compliance Hub, implementing role-based access, microservice integrations, real-time updates with Socket.io, interactive maps, and import/export compliance workflows.

Tridhya Tech PVT LTD **Associate Software Engineer** Sep 2021 – Feb 2024

- Developed core modules for the Art Mo platform, including Authentication, Gift, and Art features, enabling secure user access and seamless digital transactions.
- Built role-based authentication, subscription modules, job listings, and application workflows for the Soft Partnas recruitment platform.
- Developed core modules for the Scholar-lead School Management System, including dashboard, enrollment, network, and goal management features.
